#### Description

##### ESP - No funciona Deshacer en tablas:

##### Pasos

- 1.- Abrir gvSIG
- 2.- Abrir Tabla NUEVA
- 3.- Abrir tabla concejos.navarra.dbf (<http://downloads.gvsig.org/download/geodata/tables/DBF/>)
- 4.- Menú Tabla/Comenzar Edición
- 5.- Seleccionar un registro
- 6.- Modificar valores del registro seleccionado
- 7.- Ir al menú Edición/Deshacer
- 8.- No hace nada, no restaura valores

##### ENG - Undo in tables doesn't work:

##### Steps

- 1.- Open gvSIG
- 2.- Open NEW table
- 3.- Open layer concejos.navarra.dbf (<http://downloads.gvsig.org/download/geodata/tables/DBF/>)
- 4.- Table menu and Start Editing
- 5.- Select a row
- 6.- Modify the values of the row selected
- 7.- Go to menu Edit/Undo
- 8.- There is no response, no values restored

#### History

##### #1 - 10/04/2012 12:45 PM - Abenchara Socorro

- Target version set to 2.0.0-rc1

Tampoco funciona rehacer en el build 2055

Nor does Redo in build 2055

##### #2 - 10/16/2012 04:21 PM - Juan Lucas Domínguez

- Assignee set to Juan Lucas Domínguez

**#3 - 10/17/2012 03:58 PM - Juan Lucas Domínguez**

- *Status changed from New to Fixed*

Prevented accumulation of deselectAll commands and added type in notification management.

This will probably cause that the action of deselecting all will not be added to command stack.

The problem was that a refreshment coming from a swing code caused a deselectAll undoable action.

gvSIG-desktop:r39072

Test:

- Add a table based on DBF file
- Start editing
- Change values of various fields (not just one)
- The UNDO button should undo the changes (you probably need to click twice for each change because there is an intermediate step)

**#4 - 11/12/2012 02:43 PM - María Maluenda**

- *Status changed from Fixed to Closed*

Closed in the gvSIG build 2057. You should select other row for active tools undo-redo, but works ok.
