Description

ESP - Herramientas Deshacer/Rehacer:

Pasos

- 1.- Abrir gvSIG
- 2.- Abrir VISTA NUEVA
- 3.- Abrir capa snap_polygon.shp (<http://downloads.gvsig.org/download/geodata/vector/SHP2D/>)
- 4.- Botón derecho del ratón sobre la capa en la ToC y pinchar en Comenzar Edición
- 5.- Menú Capa/Insertar y dibujar:
 - a) Cuadrado
 - b) Círculo
 - c) Elipse
- 6.- Pinchar en la herramienta DESHACER y deshacer todos los pasos hasta que el botón aparezca como desactivado
- 7.- Pinchar en la herramienta REHACER

- Solo logro rehacer el cuadrado, la primera geometría dibujada.

- Si en vez de pinchar en la herramienta de la barra de menús me dirijo a Editar/Deshacer (y deshago todos los pasos), aparece un mensaje de error "java.util.EmptyStackException"

ENG - Undo/Redo tools:

Steps

- 1.- Open gvSIG
- 2.- Open NEW VIEW
- 3.- Open layer snap_polygon.shp (<http://downloads.gvsig.org/download/geodata/vector/SHP2D/>)
- 4.- In ToC select right button menu on layer selected and click Start edition
- 5.- Go to Menu Layer/Insert and draw:
 - a) Square
 - b) Circle
 - c) Ellipse
- 8.- Click UNDO tool and undo all steps, until the button appears deactivated
- 8.- Click REDO tool

- I just can redo the square, the geometry drawn first.

- If I go to menu Edit/Undo (to undo all steps) instead of using the tool from the bar menu, appears an error message "java.util.EmptyStackException"

Tested in gvSIG build 2057. If I go to menu Edit/Undo (to undo all steps) instead of using the tool from the bar menu, appears an error message "java.util.EmptyStackException".
