En el nuevo instalador está añadida esa opción

- Status changed from Closed to New

The installer doesn't create a desktop link at least on win actually (build 2415). I've seen that this option was added only in an online installer.

Bueno, parece que ya tengo una idea de que ha estado pasando en los dos últimos builds por lo que no aparecía corregido este bug y el #4090.

Si se usa la versión online de la instalación está corregido, con la standard no. Así que tiene que ver con el proceso de generar la standard a partir de la online. Es posible que se esté generando la standard de 64 bits a partir de la online de 32. Estas presentan algunas diferencias, concretamente en la creación de los iconos del escritorio y las versiones de los exe que se lleva detrás (cygcheck por ejemplo).

Voy a repasar el proceso de generación de las standard.

Pues efectivamente se estaban generando las versiones "standard" de los instalables de 64 bits a partir de la versión online de 32 bits.
