### Description

After adding a geodatabase connection to ArcSDE it is possible to see the layer list in the ArcSDE geodatabase in the 'Add layer...' window, but adding any table to the map generates an error:

Error loading layer: [ArcSDE layer name]

NullPointerException (DBLayerDefinition.java)

This has been tested with:

- gvsig 1.10, 1.11 and 1.12
- ArcSDE 9.3 versioned tables and ArcSDE 10 non-versioned tables
- Oracle 9 and 10.
