Description

Open gvSIG

Create a new view

Add any layer

Double click in the symbol of the name in ToC to change the symbology (or right click on ToC name layer, properties, symbols, choose symbol)

A Warning Message appears:

  "java.lang.NullPointerException"

Maybe it is related with #1248

I have realized this bug, but I checked it with two partners and they don't have any problems in both tickets (this one and #1248)
