Target version:		Spent time:	0.00 hour

Description

IDENTIFICADOR: georesources

NOMBRE: Georesources

DESCRIPCION:

The geoResources plugin for gvSIG Desktop allows to store and organize local and remote data. The resources are included in a hierarchical tree of categories and have some metadata to let the user to filter and search over his collection easily.

The main features of the geoResources extension for gvSIG are:

- Define collections to store the resources
- Define a hierarchical set of categories
- Add description and notes to the resources
- Add any number of categories to the resources
- Validate the collection set of categories with an external vocabulary
- Load any resource on a gvSIG view
- Search on the collection on layer names, descriptions and so on
- Reorganize the categories, copying and moving categories over the collection

USUARIO: jsanz, manager

Valores posibles para PERFIL:

- manager
- developer
- reporter

History

#1 - 12/27/2011 12:57 PM - Joaquín del Cerro Murciano

Hay que restaurar el svn que esta en:

gvSIG-devel:/home/gvSIG/svndumps2/georesources.dump.7z

#2 - 12/28/2011 09:57 AM - José Badía

- Status changed from New to Fixed
- Assignee set to José Badía
- % Done changed from 0 to 100

#3 - 01/19/2012 12:05 PM - Joaquín del Cerro Murciano

- Status changed from Fixed to Closed
