Description

En: can't save when symbology line properties has an image in my server file (X:\Bases\bases graficas\svg\flechas). It works fine if the same image is in my desktop

Es: No puedo guradr el proyecto si tengo simbologías con imágenes en la propiedad de la linea, y es imagen esta en mi servidor (X:\Bases\bases graficas\svg\flechas). Funciona bien si la misma imagen está en mi escritorio.

message:

Error guardando el proyecto: yukii.gvsproj
Error getting or setting the state of an object.

- Category set to Application

- Target version set to 2.0.0-rc1

#3 - 10/30/2012 03:33 PM - Juan Lucas Domínguez

- Status changed from New to Awaiting response

Do we allow resources in different drive units (D: X: etc)?

#4 - 10/30/2012 03:50 PM - Mario Fevre

I don't know if you allow it.

But in previous versions this worked just fine.

And it is very usefull

#5 - 10/31/2012 03:55 PM - Juan Lucas Domínguez

- *Status changed from Awaiting response to Fixed*
- *Assignee set to Juan Lucas Domínguez*

Do not relativize resource paths if different drive units (should happen in Windows only).

gvsig-desktop:r39128

Test suggestions:

- Before testing this, remove the folder: <user>/gvSIG/Symbols
- If should be tested in Windows and also in Linux using an image which is in another disk or in a network unit (for example in a pen-drive)

#6 - 11/05/2012 10:29 AM - Juan Lucas Domínguez

Using utility method to normalize file path.

gvsig-desktop:r39139

Test suggestions:

- Before testing this, remove the folder: <user>/gvSIG/Symbols
- If should be tested in Windows and also in Linux using an image which is in another disk or in a network unit (for example in a pen-drive)

#7 - 11/08/2012 01:15 PM - María Maluenda

- *Status changed from Fixed to Closed*

Closed in the gvSIG build 2057
