Description

IMHO a good idea in order to keep a gvSIG desktop installation updated could consist into adding a cumulative patch in the Addons manager repository. This "special" addon would be like a minor release (following the "release early, release often" principle), it would avoid users to wait major release and help to keep always a fresher gvSIG, when newer bugs are fixed.

Excuse me, I think this is only a "new feature request". Please, change it, because I don't have the admin rights. Thanks.
