Category:	
Target version:	
Severity:	Add-on name: Unknown
gvSIG version: 1.12.0	Add-on version:
gvSIG build: 1417	Add-on build:
Operative System: Windows	Add-on resolve version:
Keywords: kml export layer	Add-on resolve build:
Has patch: No	

Description

kml-layer export aborts with attached error message. Layer is a simple point layer 2d. It does not always happen, but for this specific layer it does. Logfile attached.

Klaus

Hello. According to the log file, there is a problem with the management of the color of those points. Perhaps the color of those points is special? Do they have transparency? If it is a shapefile, can you attach it and explain the symbology used in that layer?

#2 - 01/15/2014 12:21 PM - Álvaro Anguix

- Project changed from Application: gvSIG desktop to | gvSIG desktop 1

- Category deleted (Application)
