Description

1. Load a shape file.
2. Start editing.
3. Open its attribute table.
4. Select some fields.
5. Press the button "remove fields"
6. Get an error message.

The error appears each time a field is removed.

Nevertheless, changes are stored after stopping editing.

I'm attaching the log file.

History

#1 - 12/05/2012 09:09 AM - Juan Lucas Domínguez

- Assignee set to Juan Lucas Domínguez

This bug was also reported by Álvaro Anguix but I could not reproduce it.

It happens while drawing the geometries.

I think it happens only sometimes.

Please follow these steps so I can reproduce it:

- Before clicking the button to remove the fields, make a screenshot of your desktop and attach it to this ticket, because the problems perhaps depends on the position of the view and the table.

- Attach the shapefile to this ticket or send the link to it.

#2 - 12/05/2012 09:09 AM - Juan Lucas Domínguez

- Status changed from New to Awaiting response

#3 - 12/07/2012 01:46 PM - Joaquín del Cerro Murciano

- Target version changed from 2.0.0-rc1 to 2.0.0-final

#4 - 12/19/2012 02:09 PM - Manuel Madrid

- Target version changed from 2.0.0-final to 2.0.0-rc3

#5 - 12/19/2012 03:01 PM - Juan Lucas Domínguez

- Status changed from Awaiting response to Fixed

Set methods as synchronized to prevent possible thread concurrence issues. First test with huge SHP file did not show difference in performance.

gvSIG-desktop:r39488

This error is not easy to reproduce, so it's not guaranteed to be solved after the change made.

#6 - 02/26/2014 12:34 PM - Álvaro Anguix

- Status changed from Fixed to Closed
