Description			
<p>Having the edition of a layer line active, we add a new simple line, clicking the origin of this line and the end, automatically it takes the end point of the first line like the origin of the second one (the behavior is like a polyline divide it by some simple lines). Maybe in same cases, the user wants digitize some lines but not consecutively and now to do this, we have to cancel the tool and begin it again (2 extra clicks)</p>			

History

#1 - 12/07/2012 01:47 PM - Joaquín del Cerro Murciano

- Target version changed from 2.0.0-rc1 to 2.0.0-final

#2 - 12/15/2012 05:20 PM - Manuel Madrid

- Target version deleted (2.0.0-final)

#3 - 04/23/2015 02:26 PM - Álvaro Anguix

- Target version set to 2.2.0-2307 (rev. org.gvsig.desktop-2.0.94)

- Status changed from New to Closed

Con la nueva edición, el comportamiento es el correcto.
