### Description

- 1.- Open gvSIG (RC1)
- 2.- Open new view (EPSG 23030)
- 3.- Add new layer: WFS cit:comunic\_lin\_300k (<http://inspire.cop.gva.es:80/geoserver/wfs>)
- 4.- Click in layer and right button
- 5.- Select properties
- 6.- Click Labeling
- 7.- Enable labeling, field: tipo, 10, pixels in the world, color=black. Apply and accept.
- 8.- You can view that labeling not appears.
- 9.- Click in layer and right button
- 10.- Select properties
- 11- Click Labeling. You can view that labeling is disabled

- 
- 1.- Abrir gvSIG (RC1)
  - 2.- Abrir nueva vista (EPSG 23030)

Fixed WFS layer properties management and labeling with on-the-fly reprojection.

gvSIG-desktop:r39492

A good test in this case is:

- Create a view in EPSG:4326 (not EPSG:23030)
- Load the layer specified in the original message (you cannot change the source CRS, so there is on-the-fly reprojection)
- Enable labels and use the options: "1 km" and "in the world" and it should work (you can also check that the labels are approximately 1 km in height)

The test described by María should also work.

- Status changed from *Fixed* to *Closed*
