Description

1.- Open gvSIG (BN 2061 RC2)
2.- Add two tables, merindades.dbf and zonas_basic_salud.dbf
3.- Apply Join: Select a data store: zonas_basicas_salud / Next/ Select the second data store: merindades/Next / Area, Nombre, 1, 2, Atributes to join: MERINDAD and Cnt_MERIND/ NEXT/FINISH
The join not appears in BN 2061, but in BN 2060 works fine.
