**Description**

Hi,  
I've installed gvsig build 2063 and when I'm starting the application I have a problem, I have a NullPointerException.  
This is the error:

```
java.lang.NullPointerException java.lang.NullPointerException: null
org.gvsig.editing.EditionLocator.getCADToolAdapter(EditionLocator.java:71)
org.gvsig.editing.CADEExtension.getCADToolAdapter(CADEExtension.java:133)
    org.gvsig.editing.CADEExtension$myKeyEventPostProcessor.postProcessKeyEvent(CADEExtension.java:352)
java.awt.DefaultKeyboardFocusManager.dispatchEvent(DefaultKeyboardFocusManager.java:714)
java.awt.DefaultKeyboardFocusManager.preDispatchKeyEvent(DefaultKeyboardFocusManager.java:969)
java.awt.DefaultKeyboardFocusManager.typeAheadAssertions(DefaultKeyboardFocusManager.java:841)
java.awt.DefaultKeyboardFocusManager.dispatchEvent(DefaultKeyboardFocusManager.java:668)
java.awt.Component.dispatchEventImpl(Component.java:4502)
java.awt.Container.dispatchEventImpl(Container.java:2099)
java.awt.Window.dispatchEventImpl(Window.java:2475)
java.awt.Component.dispatchEvent(Component.java:4460)
java.awt.EventQueue.dispatchEvent(EventQueue.java:599)
org.gvsig.andami.ui.AndamiEventQueue.dispatchEvent(AndamiEventQueue.java:67)
    java.awt.EventDispatchThread.pumpOneEventForFilters(EventDispatchThread.java:269)
    java.awt.EventDispatchThread.pumpEventsForFilter(EventDispatchThread.java:184)
    java.awt.EventDispatchThread.pumpEventsForHierarchy(EventDispatchThread.java:174)
    java.awt.EventDispatchThread.pumpEvents(EventDispatchThread.java:169)
    java.awt.EventDispatchThread.pumpEvents(EventDispatchThread.java:161)
    java.awt.EventDispatchThread.run(EventDispatchThread.java:122)
```

I've looked in the code and the trace error is the following:

- CADEExtension.java, method postProcessKeyEvent() call CADToolAdapter cta=getCADToolAdapter();
- CADEExtension.java method getCADToolAdapter() call EditionLocator.getCADToolAdapter();
- EditionLocator.java method getCADToolAdapter() call

```
ViewDocument view = (ViewDocument) ProjectManager.getInstance().getCurrentProject().getActiveDocument(ViewDocument.class);
```

I have the NullPointerException in this method. Have you got any idea?

Thanks in advance

En el build de la 2.1 2216 no falla el plugin de edición, por lo que cierro este ticket.
