Description

When the source has fields with more than eleven characters, the application shows an error

java.lang.IllegalArgumentException: Attribute name 'Unidad_medi' not found in the feature.
    at org.gvsig.fmap.dal.feature.impl.DefaultFeature.get(DefaultFeature.java:281)
    at org.gvsig.exportto.swing.prov.shape.ExporttoShapeService.setNonNulls(ExporttoShapeService.java:416)
    at org.gvsig.exportto.swing.prov.shape.ExporttoShapeService.export(ExporttoShapeService.java:337)
    at org.gvsig.exportto.swing.prov.shape.ExporttoShapeService.export(ExporttoShapeService.java:169)
    at org.gvsig.exportto.swing.impl.DefaultJExporttoServicePanel$Export.run(DefaultJExporttoServicePanel.java:231)

The problem is that the field name is cut to be exported to SHP format. After cut, this field is requested to the source with the short name.

Other problem is that, if the source has two fields which the eleven first characters are equal there will be a problem exporting to SHP format

#4 - 08/14/2013 09:07 AM - Juan Lucas Domínguez

- Status changed from New to Fixed

Renamed long names to short ones also avoiding repetitions. Finally a dialog informs of changes in names.
