Has patch: Yes	Hito:
Add-on name: unknown	

Description

When you open Addon Manager and select a file as package source, the list doesn't show the new addon to install.

Debugging I found that it happens because new plugins are added to table model (PackagesTableModel) when source has default packages only (and gvspkg has none default package defined).

History

#1 - 01/16/2012 03:11 PM - Jose Manuel Vivó Arnal

- File *org.gvsig.installer.swing.impl_fixed_show_packages_in_table_when_file_as_source.patch* added

#2 - 01/16/2012 03:17 PM - Anonymous
