<b>Description</b>			
If a package is generated from a thematic map with raster layers of file type, the raster files are not included into the package.			
If you distribute the package to another user, when the thematic map is open the user is asked to look for the not included raster files.

Soluciado.

Ahora se pueden exportar a vistas portables todo tipo de capas raster incluidas todas las capas raster remotas.

Añadida la funcionalidad de si una capa no esta disponible se muestre el interrogante en el TOC.
