<b>Has patch:</b>	No	<b>Proyecto:</b>	
<b>Add-on name:</b>	Unknown	<b>Hito:</b>	
<b>Add-on version:</b>			

**Description**

Now (BN2066) the only information given is the URL, which is not very intuitive in order to decide which one to select. Two improvements are proposed:

1. Provide a description instead (or apart from) the URL.
2. Add a radio button to select between two options:
  - a) load the packages of my specific build
  - b) load the latest packages available that are compatible with my version

**History**

**#1 - 01/14/2014 10:46 AM - Álvaro Anguix**

- Status changed from New to Closed

En el 2216 hay información junto a la URL, como testing gvSIG repository, Official gvSIG repo...

Por el momento creo que es suficiente para el usuario.

**#2 - 01/16/2014 03:10 PM - Joaquín del Cerro Murciano**

- Target version changed from 2.1.0-2223-rc1 to 2.1.0-2217-devel
