Description

1. Open gvSIG 2.0 2066
2. From the addons manager, find and mark to install these plugins:
 - org.gvsig.chart.app.mainplugin
 - org.gvsig.chart.app.layoutplugin
3. Restart gvSIG
4. Just after start we get an error message (log file attached)

I can't reproduce it. Maybe you're trying to install it with the first build of mainplugin and it causes this error.

Anyway, this plugin is outdated. Try it with the new version of mainplugin (build 3) and check if it persist.

Thanks

The error happens when installing both plugins on a standard gvSIG installation which is the most common scenario. Did you try with this scenario?

- File log2.txt added

I've tried installing both packages directly from the remote repository (<http://downloads.gvsig.org/download/gvsig-desktop/>) and downloading them and installing from file, with the same result. I've also check it using the first build of mainplugin with a succesfull results.

What do you do different to get that log message?

Can you try it when the new build of mainplugin will be published (build 3) to check if that error is fixed?

#4 - 01/13/2014 12:38 PM - Álvaro Anguix

- Status changed from New to Won't fix

En los últimos builds la instalación standard lleva por defecto instalados los plugins de charts, por lo que este bug ya no tendría sentido (de hecho no se puede comprobar, ya que la instalación standard los lleva prefijados).

Le cambio el estado.
