Description

1. Load some vector layers.
2. Create a group (multiselect them and right-click on one of them > Group layers)
3. Right-click on the group > copy
4. Go to an empty view
5. Right-click on the Table of Contents > paste
6. Check that, apart from the group it is copied also each layer separately

Me ocurre una cosa rarísima al intentar comprobar este bug.

Añado 3 shp (calles_portal, callejero_valencia, calles_vlc).

Agrupo las 3 y dejo el nombre por defecto ("Agrupación").

Pulso con el botón derecho del ratón sobre Agrupación y me sale una ventana en la que me dice que no encuentra los archivos (pero además me pregunta por otros shp diferentes de Andalucía)

Adjunto log.
