Description

I try to load OSM layers on a View, the layer is added to the TOC, but nothing is shown (just a message on status bar "Drawing...").

Moreover, if I create a second view, and I try to load a OSM layer again, it gets added to the first View instead of to the second one. This is a consistent behaviour (if I try to add more OSM layers to the second view, all of them get added to the first view).

Lo relaciono con el bug que impide probarlo en el 2218. A comprobar en el siguiente build 2219 (aunque Nacho ha subido una nueva versión de los paquetes de raster poder actualizarlos).

Las pruebas que he realizado me funcionan; César, lo cierro, si te persiste avisa.
