Description

When opening a view for first time after a fresh install a couple of java.io.FileNotFoundException appear in the log:

```
plugins/org.gvsig.raster.wms.app.wmsclient/plugin-persistence.dat
plugins/org.gvsig.raster.wcs.app.wcsclient/plugin-persistence.dat
plugins/org.gvsig.wfs.app.mainplugin/plugin-persistence.dat
plugins/org.gvsig.raster.wmts.app.wmtsclient/plugin-persistence.dat
```

User is not notified about these exceptions and they doesn't affect the correct flow of the app but i think that it can be easily fixed and it avoid noise.

To reproduce it, i think that is enough remove the config folder and launch the app

History

#1 - 01/29/2014 04:17 PM - Álvaro Anguix

- Category set to Application
- Target version set to 2.1.0-2223-rc1

#2 - 02/01/2014 12:11 PM - Álvaro Anguix

- Assignee set to Joaquín del Cerro Murciano
- Target version changed from 2.1.0-2223-rc1 to 2.1.0-2221-testing

#3 - 02/20/2014 11:42 AM - Álvaro Anguix

- Status changed from New to Invalid

No se considera un error, podría hacerse el código más limpio pero no tiene ninguna repercusión.
