Description

The "Selection by polyline" tool at the view is missing in gvSIG 2.

I attach an image of the tool in gvSIG 1.

- File gvSIG.log added

I've seen that it was in the Extensions section at the Preferences menu but not active. I've activated it but after restarting gvSIG it doesn't run. I attach the log file.

Mario, "Select by polyline" and "Select by polygon" have the same menu position (301300000) in the config.xml files of their extensions (respectively *org.gvsig.selectiontools.app.mainplugin* and *org.gvsig.app.mainplugin*). Maybe this is the reason why "Select by polyline" is missing. It's clear that selection menu and toolbars need to be reorganized a little bit (see #2527).
