Description

- Create a view using EPSG:4326 or EPSG:23030 CRS
- Load the following layer: <http://www.eea.europa.eu/data-and-maps/data/eea-coastline-for-analysis>, selecting EPSG:3035 as projection

Result: the layer is loaded but nothing is shown. I have trying using no transformation, and also using several of the offered EPSG transformations.

I have also tried with different layers having similar results. Attached log corresponds to a ESPG:4326 layer loaded on a EPSG:23030 view.
