Description

Reportado por Georg Sedlmeir en lista internacional:

we are trying to connect to the official bavarian geoportal to retrieve aerial imagery using the following URL:

http://10.176.29.48/ogc/ogc_dop200_0a.cgi?service=WMS&request=GetCapabilities&version=1.1.1x%x%

I'm ruling out proxy setting issues, since the connection can be established from the same computer using ArcGIS, plus I can connect to other WMS services from gvSIG. I tried with gvSIG 1.11 and 2.1. Any ideas what might be wrong?

Lo he comprobado y no se conecta.

Associated revisions

Revision 41316 - 05/02/2014 04:27 AM - Joaquín del Cerro Murciano

fix a bug reading the Capabilities of WMS / WCS when before the WMS version had a header of more than 1Kb.
