Description

The map template file extension is actually .gvsLayoutTemp and it seems like a typo. Please, restore the old .gvt extension or choose a less weird new one, e.g. .gvst or .gvt2 in order to distinguish them from the 1.x version.

Joaquin, thank you very much. I think that ".gvslt" is a good option. Cheers.

I can confirm the same in BN2228 32 bit on Windows (.gvsLayoutTemp instead of the new one).
