Description

The gvSIG geoprocesses in the toolbox have not help files yet and it seems that it's not possible to replicate the same structure of SEXTANTE ones at the moment, neither in the `org.gvsig.geoprocess.app.mainplugin\en` folder, nor in `org.gvsig.geoprocess.app.mainplugin\help\en one` (IMHO the best choice).

The idea is to reuse the help files of gvSIG 1.12 inner geoprocesses converting them into the same format of SEXTANTE help files (XML files plus some images).

Hi Antonio,

Is this ticket similar to 1232? If it's the same, it can be closed

Hi Alvaro,

it's not the same because this ticket is relative to gvSIG geoprocesses (not SEXTANTE ones) which are without help files yet. So it should not be closed at the moment (build 2254).

Antonio, I tested it and I can see the help files of gvSIG geop. in last build (2262).

I close this ticket.

Hi Alvaro,

I've tested build 2262 and the help files for gvSIG geoprocesses are not visible, at least on Windows.

Ok, thanks, in Linux works fine.

He probado gvSIG en Windows XP y sí salen la mayoría de la ayudas de los geoprocessos.

Sin embargo, he encontrado unos cuantos que no mostraban la ayuda ni en Windows ni en Linux.

Son estos:

- Cambiar tipo de dato
- Máscara
- Buffer lateral
- Cortar líneas
- Componentes principales
- Tasseled Cap

Unos era porque el nombre del archivo de ayuda no coincidía con el nombre del geoprocreso, otros porque no estaban en la dirección esperada.

Se ha arreglado, y los arreglos serán efectivos cuando se generen nuevos builds de raster, geoprocessos, roimask, principalcomponets y tasseledcap.
