Hola Antonio,

a la hora de usar las traducciones en gvSIG 2, en lugar de usar "PluginServices.getText" es recomendable usar el metodo getTranslation del I18nManeger. Por ejemplo, en lugar de:

```
public String getTitle() {  
    return PluginServices.getText(this, "notifications_mode");  
}
```

Usar:

```
public String getTitle() {  
    I18nManager i18nManager = ToolsLocator.getI18nManager();  
    return i18nManager.getTranslation("notifications_mode");  
}
```

;)

Hi Joaquín, you're right. I was (wrongly) inspired by the other preference pages. :P
