Description Steps in order to reproduce this bug: <ul style="list-style-type: none">- create a view and set its CRS as EPSG:3857;- add an OSM layer (e.g. Mapnik) to the view;- add vector layer to be reprojected on the fly using an EPSG transformation (even if the layer will not match with the OSM one, see #2739);- finally, save the project. Result: an error occurs trying to save the project due to many persistence exceptions (see the gvSIG.log in attachment).

In the third step, the EPSG transformation is not needed. For instance, the issue happens also with vector layer defined in WGS84.
