Description

El instalador por defecto mete la BBDD de EPSG 6, cuando debería añadir la última (8.5)

History

#1 - 09/16/2014 06:01 AM - Antonio Falciano

+1 Because the EPSG Registry v. 8.5 contains also the previous ones, if it passes all the compatibility tests (e.g. #2621), there will not be the need to distribute the old versions when gvSIG 2.1.0 final will be released. For instance, consider that GDAL usually comes with only a bundled EPSG registry version (8.5 in trunk since few days). The EPSG Registry packages will be very useful starting from the future releases.

#2 - 09/18/2014 09:24 AM - Joaquín del Cerro Murciano

- Status changed from New to Fixed

#3 - 09/18/2014 11:11 AM - Joaquín del Cerro Murciano

- Target version changed from 2.1.0-2259-rc3 to 2.1.0-2247-testing

#4 - 09/19/2014 07:41 AM - Álvaro Anguix

- Status changed from Fixed to Closed
