Description

If follow these steps:

- we insert a legend in a layout,
- we simplify it
- we remove the text with the name of the layer for example with "Remove selected elements" tool.
- we undo

the legend is duplicated, one of them is joined and the other one is simplified.

After that I saved the project, and I couldn't open it again, I get an error.

I attach the following files:

- gvSIG.log with the undo error.
- gvSIG.log when opening the project
- The project that gives the error.

I can't reproduced it now. Probably it was fixed as a collateral effect of fixing the history behaviour in the past months.

Please, reopen the ticket if you can reproduce the bug again.
