<b>Has patch:</b>		<b>Proyecto:</b>	
<b>Add-on name:</b>	Unknown	<b>Hito:</b>	
<b>Add-on version:</b>			

#### Description

Because it's not clear what "(default)" encoding means in the layer properties of Add layer, it would be very useful to have an "Encoding" option in the Preferences, like it was in gvSIG 1.12 (see screenshot in attachment), in order to let the user specify the default encoding of the tables (DBF or not).

#### History

#1 - 09/24/2014 02:12 PM - Antonio Falciano

- Status changed from New to Invalid

I set this ticket as invalid, because I've reformulated the feature request in #2843.
