<b>Has patch:</b>		<b>Hito:</b>	
<b>Add-on name:</b>	Unknown		
<b>Description</b>			
<p>The Geoprocesses toolbox is not refreshed when we click on the Toolbox button (or its menu option) or when something changes in the active view, e.g. the kind of layers added. Furthermore, if we close the toolbox and reopen it, it memorizes the previous search. So we need first to delete the content of the search text box, before starting another one. This is a very tedious issue and time consuming.</p>
