**Description**

When we load this WFS server the layer is loaded at the TOC but any element is loaded:  
<http://190.0.131.125:8080/geoserver/info/tte/tteolog/ferroviario/ows?service=WFS&#38;version=1.0.0&#38;request=GetCapabilities>

(tested on a view in EPSG 4326, and the layer "Estaciones y casillas")

It works on gvSIG 1.x.

I attach the log file.
