Description

I've just noticed that the "Raster calculator" GUI in the Geoprocesses toolbox is very simplified at the moment, so it's very difficult to type a right formula. I attach two screenshots about it: one relative to gvSIG 1.12 and the other to gvSIG 2.1 build 2254.

History

#1 - 12/28/2014 05:42 PM - Antonio Falciano

- Target version set to 2.1.0-2268-rc4

Further info: if I move all JARs from *org.gvsig.geoprocess.app.sextante\lib* to *org.gvsig.geoprocess.app.mainplugin\lib*, then the Raster Calculator GUI works fine. So it's due to a dependency issue introduced recently (for instance, it worked in RC1).

- Target version deleted (2.1.0-2268-rc4)

The same issue happens also with the GUI of "Field calculator" geoprocess. So the usability of both SEXTANTE tools ("Raster calculator" and "Field calculator") is compromised right now (build 2262).
