Description

Con el último build de geoprocesos (cargado online), en Windows, al arrancar gvSIG muestra un mensaje de warning (adjunto) en el que dice que no puede encontrar el directorio de instalación del plugin.

Esto no ocurre en Linux.

Adjunto también el log.

History

#1 - 11/03/2014 04:28 AM - Álvaro Anguix

- Related to gvSIG feature requests #2958: Move all the sextante.* files in plugins\org.gvsig.geoprocess.app.mainplugin subfolder added

#2 - 11/03/2014 04:29 AM - Álvaro Anguix

- Target version set to 2.1.0-2259-rc3

#3 - 11/03/2014 04:38 AM - Antonio Falciano

This issue didn't happened to me in Windows 7, maybe because the two folders (models and scripts) were configured yet.

Further info: in the initial part of the gvSIG.log, I see the warnings about the duplicated classes of Geoprocesses addons (#2944).
