<b>gvSIG version:</b> 2.1.0	<b>Add-on build:</b>
<b>gvSIG build:</b> 2254	<b>Add-on resolve version:</b>
<b>Operative System:</b>	<b>Add-on resolve build:</b>
<b>Keywords:</b>	<b>Proyecto:</b>
<b>Has patch:</b>	<b>Hito:</b>
<b>Add-on name:</b> Unknown	

**Description**

When we execute the "Spatial join" geoprocess, the results are incomplete, the new layer doesn't have all the elements, only a few. I attach the log file and the layers.

After that I've saved the project and it hasn't been open after that, there was an error. I open a new bug for this, related to this bug.
