Description

Steps to reproduce the issue:

- create a new polygon layer with only an integer ID field;
- start editing;
- add a new feature;
- open the attribute table;
- click on Column manager;
- add a new double field (8,3) called AREA.

Result:

- the table is not refreshed;
- if I close the table and then reopen it, it's not opened.

Me sucede algo similar sin necesidad de añadir un nuevo elemento.

Pongo en edición la capa, abro su tabla y añado un campo.

No me aparece el campo añadido.

Cierro la tabla. Intento volver a abrirla y salta error.

Adjunto log.
