Description

Steps in order to reproduce the bug:

- add the two layers (polygon.shp and points.shp) contained in spatial_join.zip;
- execute the gvSIG "Spatial Join" geoprocess checking the nearest geometry option.

Result: a "Name descriptor duplicated" error occurs (see the gvSIG.log in spatial_join.zip), because there's a DIST field in polygon.shp yet.

Related to #2851 and #3117.
