Description

Cosas a revisar en las traducciones, aportadas por Piotr Pachol:

Es imposible de traducir:

Menu: Selection/_Select by attributes (_Selection_by_attributes)

Menu: Layer/ Attribute editor

Menu View/ Map Sheets - todos los elementos de menu interior

/ Add layer/ GeoDB/ Advanced - con todos los elementos interior

Menu Portable View - con todos los elementos de menu interior

Menu Tools/ Symbols /Create_package

/ Development - con todos los elementos de menu interior

/ Scripting - con todos los elementos de menu interior

"Comenzar" en Annotation dialogo

"Save in", "File of type", "File Name", "Save", "Cancel" - en Save As dialogo

"Open", "Look in" en Add File dialogo

Es imposible de traducir - abajo ejemplos de cadenas vinculado con geoprocessing :

Intersection_line

Intersection_polygon

XYShift_polygon

XYShift_line

XYShift_point

Difference_polygon

Difference_line

Difference_point

Benchmarking

Primera_capa

Segunda_capa

Capa_union

Polygons_layer

Capa_ajuste

Field_length

Breakpoints

Capa_transformada

Algunas cadenas estan traducidos pero la traducción no funciona, por ejemplo:

_Use_cache_for_CRSs
install_package
create_package
_Select by attributes
_Select by circle

Hay cadenas que en mi opinion no es valido por ejemplo:

Esta: "Area defined by a distance in meters" - Deberia ser: "Constant distance in meters"

Esta: "Area defined by a field in meters" - Deberia ser: "Field for defining distance in meters"

History

#1 - 05/28/2015 09:58 AM - Mario Carrera

Otras correcciones:

Es imposible de traducir al polaco cadenas de menu principal de gvSIG:

Menu Tools/ Scripting - todos los elementos de menu interior (esta correcto en interfaz ingles, no correcto o no traducido en interfaz espanol)

Menu View/ Add layer/ GeoDB/ Advanced - con todos los elementos interior (esta correcto en interfaz ingles, no correcto o no traducido en interfaz espanol)

Menu Layer/Export to annotation - en Annotation dialogo:

„Annotation” (esta correcto en interfaz ingles, no correcto o no traducido en interfaz espanol), „Comenzar” (esta correcto en interfaz espanol, no correcto o no traducido en interfaz ingles)

Archivo/Abrir proyecto: Buscar en, Nombre de archivo, Archivos de tipo

Archivo/Guardar proyecto: Guardar en, Nombre de archivo, Archivos de tipo

Archivo/Abrir WMC: Buscar en, Nombre de archivo, Archivos de tipo

Es imposible de traducir - abajo ejemplos de cadenas vinculado con geoprocessing :

En geoprocreso buffer, dissolve o otros (geoprocessos gvSIG): „Vectorial”

En geoprocreso intesection (geoprocessos gvSIG): „Intersection_line”, „Intersection_polygon”

En geoprocreso difference (geoprocessos gvSIG): „Difference_line”, „Difference_polygon”, „Difference_point”

En geoprocreso X and Y shift (geoprocessos gvSIG): „XYShift_polygon”, „XYShift_line”, „XYShift_point”

En geoprocreso Split lines (geoprocessos gvSIG): „SplitLines_line”

En geoprocreso Group by a field (geoprocessos gvSIG): „GroupBy”

En geoprocreso Reproject (geoprocessos gvSIG): „current_proj”

En geoprocreso Clip (geoprocessos gvSIG): „Clip_line”, „Clip_polygon”, „Clip_point”

En geoprocreso Split lines with point layer (geoprocessos Tools for line layers): „Capa_de_lineas”

En geoprocreso Symmetric difference (geoprocessos Tools for polygon layers): „Primera_capa”, „Segunda_capa”

En geoprocreso Union (geoprocessos Tools for polygon layers): „Capa_union”

En geoprocreso Spatial autocorrelation (geoprocessos Tools for points layers): „Nube_del_variograma”

En geoprocreso Snap points to layer (geoprocessos Tools for points layers): „Capa_ajuste”

En geoprocreso Add field (geoprocessos Tools for vector layers): „Field_length”

En geoprocreso Split_field (geoprocessos Tools for vector layers): „Breakpoints”

En geoprocreso Transform (geoprocessos Tools for vector layers): „Capa_transformada”

#2 - 05/28/2015 10:30 AM - Antonio Falciano

Hi Mario,

the most part of the i18n strings you have reported here are translated yet in Italian and fully working. Consider that I've fixed several i18n strings of geoprocesses in the past (gvSIG 2.1) and the Italian properties file is one of the most complete at the moment. Why are some of them impossible to be translated? Please, use the Italian language for reference in order to check if some string can be translated or not. Cheers.

#3 - 05/28/2015 10:42 AM - Antonio Falciano

Mario, the only i18n strings not translatable at the moment (gvSIG 2.2 RC2) are those of the Scripting plugin. They have been fixed yet in #2651, but the plugin is not updated yet (#3454). Hope this helps.

#4 - 05/28/2015 10:57 AM - Mario Carrera

Hi Antonio, thank you very much for the information. I've been reviewing the Spanish and English translations from the Italian one that you sent me during the last days, but I have only been able to review the first 1000 strings more or less. I'll continue but I think I won't be able to finish it before the final version.

After that I'll review if any of the issues reported by Piotr are pending.

I also would like to have the online tool to translate (launchpad), but we have to test it. At that way it would be easier to check the translations.

Cheers,

Mario
