Description

When we open an existing gvSIG project, the Open dialog shows "All files" as default file filter, instead of "gvSIG project file (*.gvsproj)" as it should. I'd remove the "All files" file filter.

refs #3438

En la ventana de "Abrir proyecto" y "Guardar como...", se ha cambiado como extensión de ficheros seleccionada por defecto, la extensión de proyectos gvSIG "gvSIG project file (*.gvsproj)", en vez de "All files" que aparecía anteriormente.

The same happens with the Save dialog when saving a project or when we open/save a map template, etc. It's a time consumer bug, not a feature request.
