Description

The editing console doesn't appear at this situation:

- We have vector layers at the View.
- We delete one of them
- After that, if we start editing on any of the vector layers that we still have at the View, the editing console doesn't appear.

History

#1 - 07/07/2015 11:40 AM - Mario Carrera

I've tested it having a vector and a raster layer only. If we delete the raster layer, the editing console doesn't appear when we start editing at the vector layer.

- Status changed from In progress to Invalid

He testeado este bug en la versión 2.3.0 build 2408 y no he podido reproducirlo. He probado con varias capas vectoriales, con capas raster y vectoriales, con diferentes orden de carga y nada.

Marco con invalido el error.
