Description

When I execute the build 2407 (win/x86_64) a warning dialog is shown. It contains the following message:

Packages are installed that are not compatible with your system.
Formats: MrSID file format support (win/x86)
Formats: Ecw file format support (win/x86)
Some are not specific to your system or architecture.

You may need to configure a 32-bit Java environment for the proper functioning of gvSIG.
