En teoria solo deberian haber dependencias con:

```
org.gvsig:org.gvsig.fmap.geometry.generalpath
```

en el main. Habria que sustituirlas por:

```
<dependency>
  <groupId>org.gvsig</groupId>
  <artifactId>${org.gvsig.fmap.geometry.impl}</artifactId>
  <scope>runtime</scope>
</dependency>
<dependency>
  <groupId>org.gvsig</groupId>
  <artifactId>${org.gvsig.fmap.geometry.operation.impl}</artifactId>
  <scope>runtime</scope>
</dependency>
```

En el pom de org.gvsig.desktop hay declaradas variables para cuando hay que referenciar a las implementaciones por si estas cambian de nombre, como a sido el caso de la implementacion de la libreria de geometrias.
