Description

The "downloader" plugin name is not very explicative, without reading its description in the Addons Manager. For instance, its name can be changed to something like "Authentication".

History

As I Know, this is a plugin in development and It mustn't appear in the distribution (it can be included in testing repository)

Hi Alvaro,

I've just verified that the downloader plugin is available in the official repository of gvSIG 2.2 and it's marked as an official one.
