**Description**

If I add a raster layer (i.e. a GeoTIFF) in a view, the application is killed. See the gvSIG.log in attachment.

**History**

- Assignee set to Francisco Díaz Carsí

**#2 - 01/21/2016 07:43 AM - Joaquín del Cerro Murciano**

- Target version set to 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153)

**#3 - 01/21/2016 01:39 PM - Francisco Díaz Carsí**

Hola Antonio,

no consigo reproducir el error en win64 ni con el build 2414 ni con el 2415.

¿podrías proporcionarnos alguna capa que te dé error?

Gracias.

- Status changed from New to Closed

Hi Francisco,

I don't know what happened, but it starts to work now in both builds (2414 and 2415)... I've simply applied the fix contained in #4033 and updated GDAL/OGR standalone libraries (not related to gvSIG). For a quick test, I have executed the "Random DEM" geoprocess and works like a charm now.

I close the ticket and I'll reopen if necessary. Thanks for your kind attention.

**#5 - 01/22/2016 11:49 AM - Antonio Falciano**

Applying the fixes provided in #4033 and, above all, #4042 solves the issue. It was due to GDAL/OGR libraries standalone installed on my pc that were loaded first in the native library path. Sorry for the waste of time.

#6 - 01/25/2016 10:35 AM - Joaquín del Cerro Murciano

- Target version changed from 2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153) to 2.3.0-2416 (rev. org.gvsig.desktop-2.0.122)
