Description

The locator is zoomable like a view, while the zoom action should be disabled on it. The locator should have a fixed spatial extent, i.e. the maximum extent of the layers added to it.

Steps in order to reproduce the issue:

 - create a view and add a vector layer;
 - add the vector layer to the locator;
 - use the mouse wheel on the locator.

Result: the locator is zoomable and the maximum extent is lost.

Related to #3091 and #3567.

- Target version deleted (2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153))

#3 - 09/05/2017 12:23 PM - Antonio Falciano

- Target version set to 2.5.1-3044

When the locator changes its extent due to user interaction, then it's quite difficult to restore the maximum extent of the available layers. So the locator becomes quite "unstable" to use.
