Description

If I try to execute this simple script called e.g. addShapefile:

```
from gvsig import *

def main(*args):

    loadShapeFile("C:\Geodata\foo.shp")
    pass
```

I get the following log message:

```
Running script addShapefile.
NameError: global name 'currentView' is not defined in <script> at line number 6
org.gvsig.scripting.ExecuteErrorException: NameError: global name 'currentView' is not defined in <script> at line number 6
6Stript addShapefile aborted.
[...]
```
