Description

- Wrong indentation
- Missing ApplicationLocatorimport.
- fset inside try.
- Missing method

before: query = self.createFeatureQuery()

after: query = self.getFeatureStore().createFeatureQuery()

Solution in featurestore.py:

```
from org.gvsig.app import ApplicationLocator
```

```
def __features(self, expresion = None, sortby="", asc=True):
```

```
    if expresion == None and sortby == "":
```

```
        return self.getFeatureSet()
```

```
    else:
```

```
        try:
```

```
            application = ApplicationLocator.getManager()
```

```
            datamanager = application.getDataManager()
```

```
            query = self.getFeatureStore().createFeatureQuery()
```

```
            if sortby != "":
```

```
                order = FeatureQueryOrder()
```

```
                order.add(sortby, asc)
```

```
                query.setOrder(order)
```

```
            if expresion != None:
```

```
                query.setFilter(datamanager.createExpresion(expresion))
```

```
            fset = self.getFeatureSet(query)
```

```
            return fset
```

```
        except Exception, e:
```

```
            return None
```
