

## Application: gvSIG desktop - gvSIG bugs #4187

### Drawing with grid at the layout works bad depending on the zoom

03/30/2016 05:21 PM - Mario Carrera

#### Description

Grid doesn't work good in different zooms:

- 1- We have the Grid activated at the Layout (vertical and horizontal distance: 1 cm.), on an extent zoom.
- 2- We draw a rectangle.
- 3- We zoom in, zooming to the rectangle.
- 4- We draw another rectangle, where one of the vertex is the same than the other one, or in the same column or row.

There's a difference between them.

I attach a screenshot.
